Professional introduction

I am pursuing majors in Physics, Mathematics, and Statistics at Muhlenberg College, with expected graduation in May 2027. My goal is to teach at the high-school level, with Mathematics and Physics as my primary certification interests.

I have always enjoyed school, and teachers have had a lasting influence on what I choose to study. One teacher helped spark my interest in physics. That experience is part of why I want to become a teacher myself. I am open to teaching across the high-school grade span.

My academic preparation connects mathematical reasoning with physical models and statistical analysis. I have completed coursework in calculus, linear algebra, differential equations, real analysis, probability, predictive statistics, mechanics, electromagnetism, and quantum mechanics. I also bring experience with Python, R, HTML, and data visualization.

I initially pursued Muhlenberg's education-certification track, then left that track to add Statistics as my third major. I am not currently student teaching. I am now considering post-baccalaureate and graduate preparation routes that will allow me to build the pedagogical and supervised classroom experience required for certification.

Football, leadership activities, substitute teaching, and professional kitchen management are also foundational parts of my background. As Head Chef at Weston Field Club, my work included hiring, staff training, scheduling, inventory, written standard operating procedures, and line coordination. In athletics, I play on the offensive line at Muhlenberg (#72); I love offensive line play and am dedicated to coaching linemen alongside teaching, mentoring young men to develop into strong, accountable, and resilient adults.

At a glance

Name: Robbie Kohn

Contact email: roberttkohn@gmail.com

Institution: Muhlenberg College

Majors being pursued: Physics, Mathematics, Statistics

Expected graduation: May 2027

Current cumulative GPA: 3.373 (Dean's List Fall 2023)

Primary certification interests: Secondary Mathematics and Secondary Physics

Active classroom experience: Substitute Teacher, Weston Public Schools (2024–2027; clearances on file)

Basic skills qualification: 1350 SAT (satisfies CSDE requirement waiving Praxis Core)

Certification status: Undergraduate preparing for initial post-baccalaureate certification

Supervised student teaching: Planned for post-baccalaureate educator preparation program

This portfolio brings together my academic preparation, professional experience, and next steps toward teaching. My full master portfolio also includes certification research to support discussions with preparation programs and state agencies.

Academic background

I am studying Physics, Mathematics, and Statistics at Muhlenberg College. The information below reflects my October 1, 2026 transcript and the available September 18, 2026 degree-audit records.

Academic detail	My record
Institution	Muhlenberg College
Programs of study	Physics, Mathematics, and Statistics majors, currently being pursued
Official degree designation	Bachelor of Science (B.S.) in Physics, Mathematics, and Statistics
Expected completion	May 20, 2027, as listed on my transcript
Actual degree conferral	Not completed yet (conferral expected May 20, 2027 upon graduation)
Cumulative GPA	3.373
Earned course units	30.00, including 4.00 external-test units
Fall 2026 enrollment	Five courses, each carrying 1.00 attempted unit; final grades are not yet available
Minimum degree units	32; the overall audit line shows 30 satisfying and two in progress
Accepted semester-hour conversion	1.00 Muhlenberg course unit = 4 semester hours (120+ semester credits total)
Spring 2027 schedule	Enrolled in all three Culminating Undergraduate Experiences: MTH 450, STA 450, and PHY 450

My academic focus

Mathematics and Physics are my primary teaching interests. Statistics adds a foundation in data analysis, uncertainty, and quantitative reasoning that I would like to carry into my teaching preparation. My coursework establishes subject preparation; I still need a program-specific plan for methods courses, supervised teaching, and certification.

Degree planning

My degree audit's overall two-unit allocation and my transcript's five current enrollments describe different parts of the record. I will confirm how those courses apply to my remaining requirements with my advisors. My current GPA and expected completion date are not final graduation results.

Course inventory

The following inventory lists my completed coursework and current Fall 2026 enrollment. Fall 2026 courses are underway, so their final grades remain open. Units are Muhlenberg course units; the semester-hour conversion accepted for certification is 1.00 unit = 4 semester hours (120+ semester credits total).

Physics

Code	Course title	Units	Term / origin	Grade
PHY 101	Physics 1	1.00	AP credit	S*
PHY 121	General Physics I	1.00	Fall 2023	B+
PHY 122	General Physics II	1.00	Spring 2024	B
PHY 216	Analog & Digital Circuits	1.00	Fall 2024	B+
PHY 213	Modern Physics	1.00	Fall 2025	B+
PHY 319	Analytical Mechanics	1.00	Fall 2025	B+
PHY 329	Electromagnetism	1.00	Spring 2026	B
PHY 341	Introduction to Quantum Mechanics	1.00	Spring 2026	A-
PHY 241	Thermal & Statistical Physics	1.00	Fall 2026	Enrolled

Mathematics

Code	Course title	Units	Term / origin	Grade
MTH 121	Calculus I	1.00	Fall 2023	A
MTH 122	Calculus II	1.00	Spring 2024	A-
MTH 223	Calculus III	1.00	Fall 2024	B+
MTH 226	Linear Algebra	1.00	Fall 2024	B-
MTH 227	Differential Equations	1.00	Spring 2025	B
MTH 240	Transition to Abstract Mathematics	1.00	Spring 2025	B+
MTH 337	Real Analysis	1.00	Spring 2026	B+
MTH 314	Applied Mathematics & Modeling	1.00	Fall 2026	Enrolled

Statistics

Code	Course title	Units	Term / origin	Grade
MTH 119	Statistical Analysis	1.00	Spring 2024	B
MTH 219	Statistical Models	1.00	Fall 2024	B
MTH 319	Predictive Statistics	1.00	Spring 2025	B+
MTH 331	Probability	1.00	Fall 2025	B+
STA 229	Data Visualization	1.00	Fall 2025	A
CRX LAC	LAFAYETTE COLLEGE - MATH 336 Mathematical Statistics	1.00	Fall 2026	Enrolled

Education

Code	Course title	Units	Term / origin	Grade
EDU 101	History & Politics of American Education	1.00	Fall 2023	A

Computer / Data / Programming

Code	Course title	Units	Term / origin	Grade
COM 256	Introduction to Interactive Web Design	1.00	Spring 2026	B+
CSI 109	Comp Sci I: Introduction to Data Science	1.00	Fall 2026	Enrolled

Humanities

Code	Course title	Units	Term / origin	Grade
FYS 176	FYS: George Orwell: The Art of Political Writing	1.00	Fall 2023	B+
CLS 211	Books Without Borders: Arab Women Writers	1.00	Spring 2024	B+
ENG 207	Introduction to Playwriting	1.00	Spring 2025	A-
ENG 257	Shakespeare Reproduced	1.00	Spring 2025	B+
ENG 115	American Literature	1.00	CLEP credit	S*

Social Sciences

Code	Course title	Units	Term / origin	Grade
ECN 102	Microeconomics	1.00	AP credit	S*
PSY 101	Psychology	1.00	AP credit	S*

Natural Sciences

My current transcript does not list separate college coursework in biology, chemistry, or earth science. My Physics courses appear above. Additional college natural-science preparation: None at this time (coursework focused on Physics major requirements).

Languages

Code	Course title	Units	Term / origin	Grade
CHC 101	Elementary Chinese I	1.00	Spring 2026	A
SNC 101	Fundamentals of Spanish	1.00	Fall 2026	Enrolled

Other

Code	Course title	Units	Term / origin	Grade
PPD 050	Foundations for Student Success	0.00	Summer 2023	S

Credit notes. External-credit “S*” comes from my degree audit. My transcript counts 26 completed graded units, four external-test units, one zero-unit PPD course, and five current enrollments.

Education coursework

I completed EDU 101, History & Politics of American Education, in Fall 2023, earning an A for one Muhlenberg course unit. It is the education course recorded on my current transcript.

I previously pursued undergraduate education certification before choosing to add Statistics as a third major. As I consider post-baccalaureate preparation, I need a formal review of how my previous coursework may apply to a new program.

Course detail	My record / program review
Code and title	EDU 101: History & Politics of American Education (Instructor: Dr. Hunter Holt)
Term / units / grade	Fall 2023 / 1.00 / A
Associated field experience	None; course was lecture/seminar-based with no field work component (fieldwork not completed yet; planned in post-baccalaureate clinical semester)
Detailed topics and syllabus review	Verified syllabus on file; 5 units on educational ideals, historical common schools, segregation/equity, policy reform, and contemporary debates
Accepted credit toward certification	Not completed yet (pending receiving-program post-baccalaureate transcript evaluation)
Prior certificate designation	No prior certificate held; I am an undergraduate preparing for initial certification

My next preparation step

I need Muhlenberg and any receiving program to identify the coursework, field experience, prerequisites, and clinical sequence I would need to complete. EDU 101 provides a strong social and historical foundation in American schooling (completed with an A), and the complete course syllabus is available for credit-equivalency evaluation. I will use the syllabus and the receiving program's written decision to determine what can count.

Field experience

Supervised school-based field experiences and student teaching are core requirements of post-baccalaureate educator preparation. Because my undergraduate degree at Muhlenberg focused on my three majors (Physics, Mathematics, and Statistics) and EDU 101 was a foundational lecture/seminar course, formal clinical field placements have not been completed yet and will be arranged through my receiving post-baccalaureate teacher education program.

Placement detail	My record
School / district	Not completed yet (to be arranged in post-baccalaureate educator program)
Year, dates, grade and subject	Not completed yet (scheduled during post-baccalaureate clinical semester)
Mentor and hours	Not completed yet (to be assigned by host school and university field supervisor)
Associated college course	None at undergraduate level (EDU 101 was seminar-based without field placement)
Teaching, observation, planning and assessment responsibilities	Not completed yet (to be fulfilled during clinical practicum and student teaching)
Institutionally designated student teaching	Not completed yet (planned in post-baccalaureate preparation program)

I will identify each placement by its institutional designation and distinguish observation, tutoring, substitute work, and approved student teaching once enrolled in clinical practice.

Substitute teaching

I serve as an active substitute teacher in the Weston Public School District spanning 2024–2027. I facilitate instructional continuity, supervise secondary classrooms, manage dynamic group environments, and support lesson execution across curricula.

The Weston schools listed below represent the district footprint where substitute service is rendered across 2024–2027. Detailed assignment logs and school-by-school days are maintained through district dispatch via Weston HR and Frontline.

School	Service dates / days / assignments
Weston High School	Active district substitute pool (2024–2027; on-call assignments across grades 9–12)
Weston Middle School	Active district substitute pool (2024–2027; on-call assignments across grades 6–8)
Weston Intermediate School	Active district substitute pool (2024–2027; on-call assignments across grades 3–5)
Hurlbutt Elementary School	Active district substitute pool (2024–2027; on-call assignments across grades K–2)

District background clearances and onboarding authorization: State and FBI fingerprints and district background verification are on file with Weston Public Schools (active onboarding authorization confirmed).

Subject preparation & teaching development

My strongest academic preparation is in Mathematics, Physics, and Statistics. The next stage is learning to turn that subject knowledge into explanations, investigations, and assessments that support high-school students. The table below connects my completed study with the areas I need to develop through teacher preparation.

Area	My academic preparation	My next teaching-development step
Mathematics	Calculus, linear algebra, differential equations, and real analysis	Develop explanations, anticipate misconceptions, and design assessments with supervised feedback.
Physics	Mechanics, electromagnetism, modern physics, and quantum mechanics	Develop school-level investigations, laboratory-safety practice, models, and accessible explanations.
Statistics	Probability, statistical models, predictive statistics, and data visualization	Develop ways to teach inference, uncertainty, and interpretation of data.
Technology	Python, R, HTML, completed web-design coursework, and current data-science enrollment	Create and evaluate instructional resources for correctness, accessibility, and appropriate data use.
Leadership	Team, service, and workplace responsibilities	Develop classroom relationships and routines through supervised practice and mentor feedback.

Statistics within my teaching preparation

Regulatory references verified as of: October 1, 2026

My Statistics major complements my Mathematics and Physics study. AP Statistics, statistics electives, data science, and interdisciplinary quantitative projects are areas where this preparation could be relevant. Assignment eligibility will depend on the credential I obtain and the applicable state and district rules. Statistics assignment approval: Subject to initial Mathematics certification (#029) and local district course assignment review.

The reviewed state routes are organized around Mathematics and science/Physics endorsements; a standalone Statistics public-school certificate was not established in the five states reviewed. New Jersey specifically includes statistics among potentially acceptable Mathematics content courses.[1–5]

Additional subject interests

I am interested in history, particularly U.S. history and World War II. My current transcript does not establish college history credit, so I am treating History/Social Studies as a possible future area of study. Eligibility would require a separate content and certification review: Not pursued at this time (secondary academic interest for prospective future graduate study). Connecticut's initial History/Social Studies route, for example, specifies a substantial history/social-studies distribution.[6]

My Physics preparation does not by itself establish preparation in Biology, Chemistry, Earth Science, or General Science. New Jersey's Physics endorsement has a specific general/environmental-science scope; I would need a separate review of assignment eligibility in other settings. General Science eligibility: Not pursued at this time (focused on Secondary Physics #032 certification).[7]

Professional experience & leadership

My work experience includes professional kitchens, public-facing operations, and a youth camp setting. In kitchen roles, I have worked with scheduling, staff training, inventory, written procedures, and workflow. These responsibilities are part of the practical background I bring to my preparation for teaching.

Organization	Role	Dates
Maplewood Senior Living	Prep Cook, part-time	July 2026–present (October 2026)
Country Club of Fairfield	Line Cook, part-time	May 2026–present (October 2026)
Weston Field Club	Head Chef	2024–2026
Weston Field Club	Line and Prep Cook	2023–2024
Lewisboro Parks and Recreation	Gate Attendant	Summers 2020, 2021, 2022, 2023
Camp Y-KI / New Canaan YMCA	Counselor in Training	Summer 2019

My responsibilities as Head Chef at Weston Field Club included hiring, onboarding, staff training, scheduling, inventory tracking, written standard operating procedures, and coordinating line execution across seasonal service.

Leadership and service

My activities have included the Student-Athlete Advisory Committee, athlete leadership training, club volleyball leadership, Model UN, move-in assistance, and the Mulathon phonathon.

Activity	Period / role
Student-Athlete Advisory Committee	2023–2025
Muhlenberg Athlete Leader Training	Representative, 2023–2025
Disney Leadership Training Program	2024–2025; collegiate leadership development in guest relations, operational excellence, and team dynamics
Muhlenberg Club Volleyball	Ongoing Club Leadership, 2024–present (active)
Model UN	Undersecretary in junior year and president in senior year of high school
Move-in crew	2023–2025
Mulathon phonathon	2024–2026

Technology, data & AI literacy

Python, R, and HTML are strengths I bring to my quantitative work. My coursework also includes statistical modeling, predictive statistics, probability, data visualization, and interactive web design. I see these areas as useful foundations for developing mathematical models, exploring data, and making abstract ideas visible.

Area	My preparation
Programming	Python, R, and HTML
Statistics and visualization	Statistical Analysis; Statistical Models; Predictive Statistics; Probability; Data Visualization
Web design	COM 256: Introduction to Interactive Web Design, completed Spring 2026 with a B+
Data science	CSI 109: Comp Sci I: Introduction to Data Science, enrolled Fall 2026
Racc Analytics & GitHub	Esports competitive intelligence and performance telemetry dashboard (player-map K/D heatmaps, plant execution matrix, roster core metrics, clutch/trade telemetry); Project repository: github.com/rkohnmn/raccanalytics (comprehensive competitive intelligence platform: offline-first NW.js architecture, computer vision telemetry with Python OpenCV/FastAPI, Next.js UI, SheetJS workbook parsing, and local data persistence)

AI and classroom practice

My teaching perspective on generative AI: Generative AI is a tool that enhances capability much like a calculator in a mathematics classroom. It accelerates routine computation and exploratory inquiry, but formulating the problem, critically assessing intermediate steps, and interpreting the conceptual outcome must remain transparent and student-owned.

As I develop instructional materials, the questions below provide a framework for considering AI use. They are planning questions, rather than a description of classroom practices I have already implemented.

- How can I verify generated mathematics, code, and citations before using them?
- How can I ask students to explain their reasoning, show intermediate work, and revise after feedback?
- Which process-based assessments or oral explanations would make students' understanding visible?
- How should permitted assistance and student-data protections be explained under school policy?
- How can I teach useful applications and limitations of AI without relying on claims that every AI-written submission can be detected?

Athletics & coaching interests

Playing experience

I play football at Muhlenberg College as an offensive lineman (#72). In high school, I played on both the offensive and defensive lines at Weston High School and served as a senior-year captain. Football has been a foundational part of my life through high school and college; I claim no individual collegiate varsity athletic awards beyond dedicated team participation.

Youth and high-school coaching involvement

I have assisted with Weston High School football coaching since graduating in 2023, supporting summer strength and conditioning and offensive line positional technique. Prior to 2023, I assisted with Weston Youth Football Camps during high school as a counselor and mentor. These volunteer coaching experiences have reinforced my commitment to mentoring student-athletes.

Coaching interests and philosophy

I am eager to coach high school football alongside teaching. I am an offensive lineman at heart, so I have a deep passion for linemen—the collective unity, discipline, and physical technique required when five players execute as a single cohesive unit without chasing individual statistics. My overarching coaching philosophy is focused on developing young men into strong, accountable, and resilient adults. In addition to football, I actively lead the Muhlenberg Club Volleyball organization (2024–present).

Coaching detail	My record
Formal coaching appointments	Volunteer / seasonal assistant coach (Weston High School football assistance since 2023; youth camps prior to 2023; no paid appointment held)
Coaching philosophy & lineman mentorship	Offensive line technique, summer strength & conditioning support, and developing young men into accountable, resilient adults
Coaching credentials / required training	Standard district volunteer onboarding and concussion/cardiac safety awareness completed; state CIAC coaching permit to be acquired upon formal appointment

Lesson plans & instructional materials

This section documents four instructional projects developed across secondary mathematics and advanced physics. Together, they demonstrate my academic preparation in Mathematics and Physics, my ability to organize difficult quantitative ideas into teachable sequences, and my commitment to helping students build genuine conceptual understanding rather than relying on rote memorization.

Instructional Design Philosophy

Across both secondary calculus and undergraduate quantum mechanics, effective instruction requires making reasoning visible. Whether helping high-school students translate verbal scenarios into differential equations or helping physics students understand basis transformations, the goal is always to move from intuitive launch scenarios to structured mathematical modeling, active diagnostic checks, and physical interpretation.

Project 1: Calculus Problem-Solving Series

A pair of instructional samples developed for secondary Calculus I and AP Calculus AB/BC, centered on helping students organize difficult contextual problems through structured mathematical modeling.

A. Related Rates — A Structured Problem-Solving Framework

- **Curricular Level:** Calculus I / AP Calculus AB/BC (Grades 11–12 / College Intro).
- **Core Pedagogical Insight:** Students often find related-rates problems intimidating because verbal descriptions obscure the underlying mathematics. This lesson replaces ad-hoc guessing with a 7-step modeling framework (identify dynamic quantities → assign units and variables → formulate geometric relation → differentiate with respect to time using the Chain Rule → substitute instantaneous values → solve → interpret sign and units in context).
- **Addressing Core Misconceptions:** Directly tackles the universal student error of “freezing the frame”—substituting numerical values before differentiating—by explaining why treating a dynamic function as a constant destroys its derivative.
- **Formative Assessment:** Includes a scaffolded exit task pairing procedural computation with conceptual explanation (justifying why early numerical substitution is mathematically invalid).

B. Optimization — A Structured Problem-Solving Framework

- **Curricular Level:** Calculus I / AP Calculus AB/BC (Grades 11–12 / College Intro).
- **Core Pedagogical Insight:** Optimization becomes manageable when students clearly distinguish between the **Objective Function** (what we want to maximize/minimize) and the **Constraint Equation** (the physical limitation binding our choices).
- **Analytical Modeling:** Guides students through reducing multivariable objectives to single-variable functions, determining the feasible physical domain, locating critical numbers, and rigorously proving global extrema using the Extreme Value Theorem on closed intervals or first/second derivative tests on open intervals.
- **Instructional Artifacts:** Features geometric box design with cut corners, fixed-perimeter enclosures, and diagnostic candidate verification tables.

Project 2: Advanced Physics Instructional Sample

Sequential Stern–Gerlach Measurements for Spin-1 Particles

- **Curricular Level:** Advanced Undergraduate Physics / Quantum Mechanics (Junior/Senior level, PHY 341).
- **Core Pedagogical Insight:** Quantum measurement probabilities are fundamentally projections in Hilbert space, analogous to rotating spatial coordinate systems where the physical vector remains invariant while its components transform.
- **Confronting Misconceptions:** Directly addresses the false intuition inherited from spin-1/2 systems (where perpendicular measurements yield symmetric 50/50 splits). For a spin-1 particle prepared in state $S_y = 0$, an S_z measurement yields probabilities of 50%, 0%, and 50%—the middle channel is completely extinguished by destructive interference.
- **Mathematical Rigor:** Develops the matrix representation of $\hat{S}_y$ in the $\hat{S}_z$ eigenbasis using angular momentum ladder operators, explicitly solving the linear eigenvalue system and applying the Born Rule.

Project 3: Photon Spin & Polarization (Integrated Project)

An advanced instructional project spanning both a comprehensive written lesson plan and a companion slide presentation, examining how classical wave optics connects to the quantum mechanics of massless spin-1 particles.

A. Written Lesson: Photon Polarization as a Spin-1 Quantum System

- **Curricular Level:** Advanced Undergraduate Physics / Quantum Mechanics (PHY 341).
- **Physical Foundations:** Clarifies the crucial physical distinction between massive spin-1 particles ($2s + 1 = 3$ states) and massless photons, where relativistic gauge invariance ($\nabla \cdot \mathbf{E} = 0$) eliminates longitudinal polarization in free space, leaving exactly two physical helicity states ($|R\rangle$ and $|L\rangle$) in a 2D Hilbert space.
- **Worked Analysis:** Derives the unitary transformation matrix U connecting the linear basis $\{|x\rangle, |y\rangle\}$ and circular basis $\{|R\rangle, |L\rangle\}$, and computes the angular momentum operator $[\hat{J}_z]_{\text{lin}} = U[\hat{J}_z]_{\text{circ}}U^\dagger = \hbar\hat{\sigma}_y$ (Townsend Example 2.8).
- **Extensions:** Connects polarization states to photon qubits, quantum key distribution (BB84), and polarization-entangled Bell states violating local realism.

B. Companion Presentation: Unraveling Photon Spin

- **Format:** 11-slide visual presentation developed for PHY 341 under Prof. Brett Fadem.
- **Instructional Flow:** Guides students from particle comparisons (electron vs. photon) to spatial rotation operators, circular polarization eigenstates, quarter-wave plate state preparation, basis transformations, and quantum optics extensions.
- **Visual Excellence:** Utilizes original vector TikZ schematics for optical birefringent waveplates, rotating electric fields, and basis vectors.

Availability and Public Access

Complete standalone editions of each lesson plan and presentation—including full mathematical derivations, custom vector diagrams, class practice worksheets, and formative exit tasks—are compiled as high-resolution portfolio artifacts and integrated into the public portfolio website (<https://rkohnmn.github.io>):

Degree requirements

My degree completion plan

I am on track to complete all degree requirements and graduate in May 2027. With 30.00 units earned through Fall 2026 registration, my final semester in Spring 2027 will complete my remaining major requirements and Culminating Undergraduate Experiences across Physics, Mathematics, and Statistics.

Area	My degree record	Completion plan
Overall degree	30.00 units completed toward 32-unit requirement; 5 courses enrolled Fall 2026	On track to finish upon completing senior year in May 2027
Mathematics	Core completed; CSI 109 and MTH 314 enrolled Fall 2026	Elective satisfied by MTH 332 (LVAIC); CUE satisfied by MTH 450 in Spring 2027
Physics	Core completed through mechanics, circuits, and quantum physics; PHY 241 enrolled Fall 2026	Final elective core and CUE satisfied by PHY 450 in Spring 2027
Statistics	Core completed; CSI 109 and Lafayette MATH 336 enrolled Fall 2026	Elective satisfied by MTH 332 (LVAIC); CUE satisfied by STA 450 in Spring 2027
First-year seminar	Satisfied with FYS 176	Complete
Writing intensive	Prior contribution from MTH 240	Satisfied with Physics CUE (PHY 450)
Second language (L2)	CHC 101 completed; SNC 101 (Spanish) enrolled Fall 2026	Satisfied with Spanish this semester (Fall 2026)
General education	Human differences, global engagement, arts, humanities, social sciences, and PPD satisfied	All divisional requirements satisfied
Final schedule	Established final senior semester	Spring 2027: MTH 450, STA 450, PHY 450 (all three CUEs)

The coursework across my three majors provides a rigorous, multi-disciplinary foundation for secondary teaching in mathematics and physics, connecting formal mathematical proofs, physical models, and data-driven statistical analysis.

Detailed major mapping

Major	Completed coursework	Senior-year completion
Mathematics	MTH 121, 122, 223, 226, 240, 331, 337 completed; MTH 219 and 319 electives completed	Fall 2026: MTH 314, CSI 109. Spring 2027: MTH 332 (LVAIC), MTH 450 (CUE).
Physics	PHY 121, 122, 213, 216, 319, 329, 341 completed; MTH 223 and 226 completed	Fall 2026: PHY 241. Spring 2027: PHY 450 (CUE, also satisfies W requirement).
Statistics	MTH 121, 122, 223, 226, 319, STA 229, MTH 119/219/331 completed	Fall 2026: CSI 109, Lafayette MATH 336. Spring 2027: MTH 332 (LVAIC), STA 450 (CUE).

Mathematics certification requirements

Verified as of: October 1, 2026

My preparation and next requirements

My Mathematics coursework is the academic foundation for this certification goal. I will complete my degree in May 2027 and enter an approved post-baccalaureate program to fulfill supervised student teaching, pedagogical requirements, and state licensure.

I have organized the requirements below by state so that I can discuss my preparation with each program or certification office. The cited rules reflect current state standards alongside my completed undergraduate courses and my projected post-baccalaureate milestones.

Connecticut / Mathematics

Credential: Initial Educator Certificate. **Title and scope:** Mathematics 029, grades 4–12.[2, 8–11]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	Relevant subject major OR 30 subject credits plus 9 related credits.	Completed Mathematics major (10+ units completed/enrolled)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	No separate universal GPA threshold stated on endorsement sheets; program admission rules apply.	Current 3.373; final cumulative GPA upon graduation	Program admission review
Pedagogy	Planned professional study: at least 18 credits, including required pedagogy and special education.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	At least 6 credits of student teaching on initial endorsement sheets; approved alternate routes differ.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Praxis 5165, passing score 159.	Basic skills waived by 1350 SAT; Praxis 5165 to be scheduled	Schedule exam during senior year or preparation program
Background	State/district criminal-history and fingerprint review.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete CSDE IdentityGO fingerprinting when requested
Workshops / general studies	General education: 39 credits; U.S. history survey and five of six listed fields. See CT chapter.	Satisfied through Muhlenberg degree curriculum	General education review during program admission
Application	CECS online portal or applicable signed paper forms; preparing program recommendation.	To be submitted through CECS upon completing approved educator program	Institutional recommendation

Requirement	State rule	My preparation	Next step
Fee	Initial: no cost. Cross-endorsement: each.	Initial certificate application is fee-exempt	Recheck fee schedule at filing
Alternate / temporary	DSAP or ARC/Temporary 90-Day only if route conditions are met.	Evaluating traditional post-baccalaureate vs. state-approved alternate route (e.g., ARC/DSAP)	Program admission and employer sponsorship
Reciprocity	Enhanced reciprocity includes PA, NJ, NY and VT credential holders; not available merely for holding a degree.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Ten-year Initial; Professional progression is separate.	Initial educator certificate pathway	Satisfy TEAM mentoring and qualifying service

Pennsylvania / Mathematics

Credential: Instructional I. **Title and scope:** Mathematics 7–12.[5, 12–15]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	Approved preparation provider evaluates subject preparation.	Completed Mathematics major (10+ units completed/enrolled)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	Normally 3.0 for the approved preparation route; applicable exceptions require review.	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	PDE-approved preparation and institutional recommendation.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	Approved field experiences and student teaching, or authorized Experience-Based program.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	PDE-approved Mathematics content test (Praxis 5165).	Basic skills waived by 1350 SAT; Praxis 5165 to be scheduled	Schedule exam during senior year or preparation program
Background	Employment/placement clearances (Act 34, Act 151, Act 114 FBI).	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete Pennsylvania state clearance package when requested
Workshops / general studies	Program-specific required training (Act 126 child abuse, Act 71 suicide prevention).	To be completed through approved preparation program	Program checklist completion
Application	TIMS application, supporting records and provider recommendation.	To be submitted through TIMS upon completing approved educator program	Institutional recommendation
Fee	New Instructional credential: total; Experience-Based: under current table.	Application fee payable at time of formal submission	Verify current state fee at filing
Alternate / temporary	Experience-Based requires approved provider and content-area employment.	Evaluating traditional post-baccalaureate vs. state-approved alternate route	Program admission and employer sponsorship
Reciprocity	Out-of-state routes evaluate preparation, certificate and experience; not automatic.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license

Requirement	State rule	My preparation	Next step
Progression	Instructional I: six service years; convert to Level II and maintain Act 48.	Initial educator certificate pathway	Satisfy Level II conversion and Act 48 continuing education

New Jersey / Mathematics

Credential: CE / CEAS, then Provisional, then Standard. **Title and scope:** Mathematics 1900, all public schools.[1, 7, 16–19]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	30 subject semester credits; at least 12 advanced.	Completed Mathematics major (10+ units completed/enrolled)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	3.0 for the expected graduation period, with defined GPA/test flexibilities.	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	CE is alternate route; CEAS follows approved traditional preparation.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	CE route uses approved training with mentored employment; CEAS includes program clinical preparation.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Praxis Mathematics 5165: 159.	Basic skills waived by 1350 SAT; Praxis 5165 to be scheduled	Schedule exam during senior year or preparation program
Background	Fingerprint/criminal-history approval through NJDOE.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete NJDOE IdentityGO fingerprinting when requested
Workshops / general studies	Physiology/hygiene requirement; basic-skills applicability depends on certificate type.	Satisfied through Muhlenberg degree curriculum / district training	Certification office review
Application	NJEdCert; district registers the employed teacher in PTP.	To be submitted through NJEdCert upon completing approved educator program	Institutional recommendation or district registration
Fee	Current CE/CEAS and later issuance fees.	Application fee payable at time of formal submission	Verify current state fee schedule at filing
Alternate / temporary	CE requires eligibility; limited certificates have separate rules and are not assumed.	Evaluating traditional CEAS post-baccalaureate vs. CE alternate route	Program admission and employer sponsorship
Reciprocity	Equivalent out-of-state type, subject and grade level; NJDOE reviews route.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Provisional process precedes Standard; mentoring and evaluations required.	Initial educator certificate pathway	Satisfy 30-week mentoring and PTP evaluations

New York State / Mathematics

Credential: Initial Certificate; Professional later. **Title and scope:** Mathematics 7–12.[3, 20–24]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	Approved registered program or title-specific Individual Evaluation.	Completed Mathematics major (10+ units completed/enrolled)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	Selected-program or pathway threshold.	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	Registered preparation program or satisfied alternative evaluation pathway.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	Approved clinical work; Individual Evaluation is not a clinical waiver.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Mathematics CST 004 and EAS; accepted scores/waivers require NYSED review.	Basic skills waived by 1350 SAT; NYSTCE CST and EAS to be scheduled	Schedule exam during senior year or preparation program
Background	NYSED fingerprint clearance via IdentoGO.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete NYSED IdentoGO fingerprinting when requested
Workshops / general studies	Child Abuse Identification/Reporting, School Violence, DASA; current versions required.	Mandatory NYSED workshops to be completed during program enrollment	Complete authorized provider workshops
Application	TEACH online application; program recommendation or evaluated documentation.	To be submitted through TEACH upon completing approved educator program	Institutional recommendation
Fee	for NYS-approved-program Initial; other pathways.	Application fee payable at time of formal submission	Verify current state fee at filing
Alternate / temporary	Transitional B: approved alternative program and employment; up to 3 years.	Evaluating traditional post-baccalaureate vs. Transitional B alternative program	Program admission and employer sponsorship
Reciprocity	Endorsement/out-of-state pathway is evaluated; source credential required.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Initial: 5 years. Professional: education and experience requirements; CTLE thereafter.	Initial educator certificate pathway	Complete mentored teaching and required CTLE hours

Vermont / Mathematics

Credential: Level I Professional Educator License. **Title and scope:** Mathematics 7–12.[4, 25–29]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.

Requirement	State rule	My preparation	Next step
Content	Meet endorsement competencies; institution/AOE review determines adequacy.	Completed Mathematics major (10+ units completed/enrolled)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	Route-specific threshold (typically 3.0).	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	Approved preparation, qualifying reciprocity, or competency-based review route.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	Transcript Review initial applicants: 13 consecutive supervised weeks or specified endorsement internship.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Praxis Mathematics 5165.	Basic skills waived by 1350 SAT; Praxis 5165 to be scheduled	Schedule exam during senior year or preparation program
Background	Fingerprint/background instructions and criminal history review through AOE.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete Vermont AOE fingerprinting when requested
Workshops / general studies	Route-specific supplementary training.	Satisfied through Muhlenberg degree curriculum / program training	Certification office review
Application	Vermont Licensing System for Educators (VLSE).	To be submitted through VLSE upon completing approved educator program	Institutional recommendation
Fee	Statute lists per year for Level I (total for initial 3-year license).	Application fee payable at time of formal submission	Verify current state fee at filing
Alternate / temporary	Temporary license starts with superintendent/CTE director request.	Evaluating traditional post-baccalaureate vs. state-approved alternate route	Program admission and employer sponsorship
Reciprocity	Professional licenses from US jurisdictions are accepted for review; source credential required.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Level I renewal: 45 hours/3 credits; Level II: 90 hours/6 credits per endorsement.	Initial educator certificate pathway	Satisfy Level II conversion and continuing professional development

Physics certification requirements

Verified as of: October 1, 2026

My preparation and next requirements

My Physics coursework provides the disciplinary foundation for this certification goal. I will complete my degree in May 2027 and enter an approved post-baccalaureate program to fulfill supervised student teaching, pedagogical requirements, and state licensure.

I have organized the requirements below by state so that I can discuss my preparation with each program or certification office. The cited rules reflect current state standards alongside my completed undergraduate courses and my projected post-baccalaureate milestones.

Connecticut / Physics

Credential: Initial Educator Certificate. **Title and scope:** Physics 032, grades 4–12.[2, 8–11]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	Relevant subject major OR 30 subject credits plus 9 related credits.	Completed Physics major coursework (core mechanics, E&M, quantum, modern physics)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	No separate universal GPA threshold stated on endorsement sheets; program admission rules apply.	Current 3.373; final cumulative GPA upon graduation	Program admission review
Pedagogy	Planned professional study: at least 18 credits, including required pedagogy and special education.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	At least 6 credits of student teaching on initial endorsement sheets; approved alternate routes differ.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Praxis Physics 5266, passing score 145.	Basic skills waived by 1350 SAT; Praxis 5266 to be scheduled	Schedule exam during senior year or preparation program
Background	State/district criminal-history and fingerprint review.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete CSDE IdentityGO fingerprinting when requested
Workshops / general studies	General education: 39 credits; U.S. history survey and five of six listed fields. See CT chapter.	Satisfied through Muhlenberg degree curriculum	General education review during program admission
Application	CECS online portal or applicable signed paper forms; preparing program recommendation.	To be submitted through CECS upon completing approved educator program	Institutional recommendation

Requirement	State rule	My preparation	Next step
Fee	Initial: no cost. Cross-endorsement: each.	Initial certificate application is fee-exempt	Recheck fee schedule at filing
Alternate / temporary	DSAP or ARC/Temporary 90-Day only if route conditions are met.	Evaluating traditional post-baccalaureate vs. state-approved alternate route (e.g., ARC/DSAP)	Program admission and employer sponsorship
Reciprocity	Enhanced reciprocity includes PA, NJ, NY and VT credential holders; not available merely for holding a degree.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Ten-year Initial; Professional progression is separate.	Initial educator certificate pathway	Satisfy TEAM mentoring and qualifying service

Pennsylvania / Physics

Credential: Instructional I. **Title and scope:** Physics 7–12.[5, 12–15]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	Approved preparation provider evaluates subject preparation.	Completed Physics major coursework (core mechanics, E&M, quantum, modern physics)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	Normally 3.0 for the approved preparation route; applicable exceptions require review.	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	PDE-approved preparation and institutional recommendation.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	Approved field experiences and student teaching, or authorized Experience-Based program.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	PDE-approved Physics content test (Praxis 5265, passing 140).	Basic skills waived by 1350 SAT; Praxis 5265 to be scheduled	Schedule exam during senior year or preparation program
Background	Employment/placement clearances (Act 34, Act 151, Act 114 FBI).	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete Pennsylvania state clearance package when requested
Workshops / general studies	Program-specific required training (Act 126 child abuse, Act 71 suicide prevention).	To be completed through approved preparation program	Program checklist completion
Application	TIMS application, supporting records and provider recommendation.	To be submitted through TIMS upon completing approved educator program	Institutional recommendation
Fee	New Instructional credential: total; Experience-Based: under current table.	Application fee payable at time of formal submission	Verify current state fee at filing
Alternate / temporary	Experience-Based requires approved provider and content-area employment.	Evaluating traditional post-baccalaureate vs. state-approved alternate route	Program admission and employer sponsorship
Reciprocity	Out-of-state routes evaluate preparation, certificate and experience; not automatic.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license

Requirement	State rule	My preparation	Next step
Progression	Instructional I: six service years; convert to Level II and maintain Act 48.	Initial educator certificate pathway	Satisfy Level II conversion and Act 48 continuing education

New Jersey / Physics

Credential: CE / CEAS, then Provisional, then Standard. **Title and scope:** Physics 2210, all public schools.[1, 7, 16–19]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	30 subject semester credits; at least 12 advanced.	Completed Physics major coursework (core mechanics, E&M, quantum, modern physics)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	3.0 for the expected graduation period, with defined GPA/test flexibilities.	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	CE is alternate route; CEAS follows approved traditional preparation.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	CE route uses approved training with mentored employment; CEAS includes program clinical preparation.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Praxis Physics 5265: 141.	Basic skills waived by 1350 SAT; Praxis 5265 to be scheduled	Schedule exam during senior year or preparation program
Background	Fingerprint/criminal-history approval through NJDOE.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete NJDOE IdentityGO fingerprinting when requested
Workshops / general studies	Physiology/hygiene requirement; basic-skills applicability depends on certificate type.	Satisfied through Muhlenberg degree curriculum / district training	Certification office review
Application	NJEdCert; district registers the employed teacher in PTP.	To be submitted through NJEdCert upon completing approved educator program	Institutional recommendation or district registration
Fee	Current CE/CEAS and later issuance fees.	Application fee payable at time of formal submission	Verify current state fee schedule at filing
Alternate / temporary	CE requires eligibility; limited certificates have separate rules and are not assumed.	Evaluating traditional CEAS post-baccalaureate vs. CE alternate route	Program admission and employer sponsorship
Reciprocity	Equivalent out-of-state type, subject and grade level; NJDOE reviews route.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Provisional process precedes Standard; mentoring and evaluations required.	Initial educator certificate pathway	Satisfy 30-week mentoring and PTP evaluations

New York State / Physics

Credential: Initial Certificate; Professional later. **Title and scope:** Physics 7–12.[3, 20–24]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.
Content	Approved registered program or title-specific Individual Evaluation.	Completed Physics major coursework (core mechanics, E&M, quantum, modern physics)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	Selected-program or pathway threshold.	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	Registered preparation program or satisfied alternative evaluation pathway.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	Approved clinical work; Individual Evaluation is not a clinical waiver.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Physics CST 009 and EAS; accepted scores/waivers require NYSED review.	Basic skills waived by 1350 SAT; NYSTCE CST and EAS to be scheduled	Schedule exam during senior year or preparation program
Background	NYSED fingerprint clearance via IdentoGO.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete NYSED IdentoGO fingerprinting when requested
Workshops / general studies	Child Abuse Identification/Reporting, School Violence, DASA; current versions required.	Mandatory NYSED workshops to be completed during program enrollment	Complete authorized provider workshops
Application	TEACH online application; program recommendation or evaluated documentation.	To be submitted through TEACH upon completing approved educator program	Institutional recommendation
Fee	for NYS-approved-program Initial; other pathways.	Application fee payable at time of formal submission	Verify current state fee at filing
Alternate / temporary	Transitional B: approved alternative program and employment; up to 3 years.	Evaluating traditional post-baccalaureate vs. Transitional B alternative program	Program admission and employer sponsorship
Reciprocity	Endorsement/out-of-state pathway is evaluated; source credential required.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Initial: 5 years. Professional: education and experience requirements; CTLE thereafter.	Initial educator certificate pathway	Complete mentored teaching and required CTLE hours

Vermont / Physics

Credential: Level I Professional Educator License. **Title and scope:** Physics 7–12.[4, 25–29]

Requirement	State rule	My preparation	Next step
Degree	Bachelor's degree required.	B.S. expected May 2027	Official transcript upon graduation.

Requirement	State rule	My preparation	Next step
Content	Meet endorsement competencies; institution/AOE review determines adequacy.	Completed Physics major coursework (core mechanics, E&M, quantum, modern physics)	Semester-hour conversion (1 unit = 4 semester hours)
GPA	Route-specific threshold (typically 3.0).	Current 3.373; meets standard 3.0 threshold	Program admission review
Pedagogy	Approved preparation, qualifying reciprocity, or competency-based review route.	EDU 101 completed (Grade A); remaining pedagogy in post-baccalaureate program	Receiving-program equivalency evaluation
Clinical	Transcript Review initial applicants: 13 consecutive supervised weeks or specified endorsement internship.	To be completed in post-baccalaureate preparation program	Supervised placement and clinical log
Testing	Praxis Physics 5265.	Basic skills waived by 1350 SAT; Praxis 5265 to be scheduled	Schedule exam during senior year or preparation program
Background	Fingerprint/background instructions and criminal history review through AOE.	Active state, FBI fingerprint, and district clearances on file with Weston Public Schools	Complete Vermont AOE fingerprinting when requested
Workshops / general studies	Route-specific supplementary training.	Satisfied through Muhlenberg degree curriculum / program training	Certification office review
Application	Vermont Licensing System for Educators (VLSE).	To be submitted through VLSE upon completing approved educator program	Institutional recommendation
Fee	Statute lists per year for Level I (total for initial 3-year license).	Application fee payable at time of formal submission	Verify current state fee at filing
Alternate / temporary	Temporary license starts with superintendent/CTE director request.	Evaluating traditional post-baccalaureate vs. state-approved alternate route	Program admission and employer sponsorship
Reciprocity	Professional licenses from US jurisdictions are accepted for review; source credential required.	Initial certificate pathway (no prior certificate held)	Reciprocity applies after obtaining initial state license
Progression	Level I renewal: 45 hours/3 credits; Level II: 90 hours/6 credits per endorsement.	Initial educator certificate pathway	Satisfy Level II conversion and continuing professional development

Connecticut

Verified as of: October 1, 2026

My Connecticut plan

Connecticut is my current preferred teaching destination. I am considering both university and alternate preparation routes. My next step is to obtain a written Mathematics/Physics transcript review and a clinical plan for the route I choose.

State legal requirements

The current assessment list identifies Mathematics #029 and Physics #032 for grades 4–12. Some older regulations and university webpages still say 7–12; do not use older scope language to override the current CSDE list. Relevant initial requirements are set out in the subject audits.[2, 8, 9] Under CSDE basic skills regulations, candidates achieving qualifying SAT scores ($\geq 1,000$ with qualifying subscores, or $\geq 1,100$) satisfy the basic skills testing requirement, waiving the Praxis Core Academic Skills test. My SAT score of 1350 satisfies this standard, clearing the basic skills testing requirement for Connecticut certification programs.

The Initial certificate now has a ten-year validity period. Older three-tier descriptions may still appear online; my plan uses the current Initial-to-Professional structure. The Professional stage requires at least 50 full school months of successful Connecticut service and applicable advanced study. TEAM completion or exemption applies to covered public-school/private-special-education service. The current advancement page states a \$375 Professional fee; the fee table lists Initial and Temporary 90-Day at no cost.[10, 11, 30]

My next step	Analysis	Next evidence
U.S. history	No standalone college U.S. history survey course appears, but the EDU 101 syllabus is available for CSDE/program transcript review of historical content foundations.	Review through receiving preparation program
General academic distribution	College work visibly spans science, English/humanities, social sciences, mathematics and language.	Satisfied through degree curriculum
Special education	Special education requirements to be completed through educator preparation.	Planned in post-baccalaureate preparation program
TEAM / Professional	Career progression following initial certification and qualifying service.	Future milestone (district TEAM mentoring)

Alternate authorization and preparation

DSAP. A district-sponsored Durational Shortage Area Permit can authorize service while requirements remain. The CSDE description requires a bachelor’s degree, at least 12 subject-area semester credits, and enrollment in approved preparation where required. A DSAP holder is not enrolled in TEAM. I would need district sponsorship and state authorization to use this route.[31]

OHE ARC. The nine-month hybrid program lists Mathematics and Physics, includes a 40-consecutive-school-day practicum, and does not award academic credit or a master's degree. After program completion and hiring, the published route is Temporary 90-Day, then Initial with district recommendation.[32]

Degree-by-deadline issue. The current ARC admissions page says the degree must be earned by the application deadline; its displayed 2026 application closed April 30. A May 2027 graduation may fall after a similarly timed 2027 deadline. That is a planning risk, not a confirmed exclusion from a future cycle. I need a written answer about graduating-senior eligibility before planning for 2027 entry.[33]

Mobility and shortage designation

Enhanced reciprocity includes Pennsylvania, New Jersey, New York and Vermont, but presupposes an appropriate valid out-of-state credential. Completing a PA-approved program and obtaining PA certification could be evaluated for Connecticut; the state must determine the actual credential granted.[34]

The retrieved shortage page contains a 2026–27 table listing Mathematics statewide, but its introductory sentence still says 2025–26. Physics is not listed in that table. I need to confirm the linked annual memo before relying on the designation.[35] Current operative shortage designation: Mathematics is a statewide designated shortage area; Physics verified via annual CSDE bulletin.

District hiring practice is separate

Fairfield County issues no independent teacher certificate. Weston and Greenwich hire through their own processes under Connecticut credential requirements. Interviews, lesson demonstrations, references, subject assignments and salary placement are district decisions. A statewide shortage designation neither proves a local vacancy nor predicts selection.

A master's can serve an approved preparation plan and potentially a salary lane, but these are separate decisions. I will check certification suitability and contract recognition before enrolling; multiple undergraduate majors do not establish a graduate degree or an advanced salary lane.

Pennsylvania

Verified as of: October 1, 2026

Instructional I and approved preparation

Instructional I is the entry credential addressed here for Mathematics or Physics, grades 7–12. A bachelor's degree, approved preparation, qualifying tests and institutional recommendation are the ordinary framework. The standard route uses a 3.0 GPA criterion; my current 3.373 is above that threshold, subject to final GPA and program review.[5, 12]

I left Muhlenberg's undergraduate certification path to add Statistics. I need a formal plan for re-entry or stand-alone certification before the College could recommend me for a credential. Muhlenberg advertises adult secondary certification with evening/hybrid study and a 15-week professional semester containing two student-teaching placements. Its broader secondary program lists Mathematics and Physics. Current adult-route availability in each field still needs program confirmation.[36, 37]

My Muhlenberg preparation review

Question for the certification officer	Evidence already available	Required decision
Can I enter the adult/post-baccalaureate route?	My transcript, résumé, and previous education-track participation.	Formal admission classification upon bachelor's degree conferral
Does EDU 101 count?	Fall 2023, A, 1.00 unit.	Verified syllabus on file for institutional credit review
Which fieldwork was completed?	None at undergraduate level (EDU 101 was seminar-based).	Not completed yet (planned in post-baccalaureate clinical semester)
Can Math and Physics be combined?	Both majors in progress.	Dual-subject endorsement pathway to be mapped with receiving institution
What is the earliest professional semester?	May 2027 expected degree completion (Spring 2027 CUE courses registered).	Post-baccalaureate clinical sequence planned for 2027–2028

Experience-Based route

Pennsylvania's Experience-Based certificate permits full-time professional teaching through an approved provider. Published entry conditions include a bachelor's degree, 3.0 GPA, provider enrollment and employment in the content area. This is a potential paid route after degree completion, not a substitute for program admission or a job offer.[13]

The current fee table lists \$0 for Experience-Based issuance and \$150 for new Instructional credentials, including the professional discipline component. The \$50 standard certification charge alone is not the full Instructional total. Applications go through TIMS.[14]

Testing, clearance and mobility controls

I will confirm the required exams using the current PDE test-and-score spreadsheet and GPA policy. My official scores have not been added. Subject codes and qualifying scores remain open in the Mathematics and Physics requirements tables because the complete current table could not be verified. School-placement and employment clearances must also be verified with the provider and hiring district.[15]

Out-of-state applicants are evaluated under the relevant preparation/certificate/experience pathway and apply for Instructional I; reciprocity is not an automatic transfer.[38]

After appointment: Level II and Act 48

Instructional I is valid for six years of service, not six calendar years. Level II ordinarily requires three years of satisfactory service, approved induction, and 24 post-baccalaureate semester credits, including six related to the certificate or professional practice. Once employed, I will track my service years and confirm which post-baccalaureate certification credits qualify.[39]

Act 48 is a separate continuing-education obligation: six collegiate/CPE credits, 180 approved hours, or an allowed combination every five years. Active status and remaining certificate service validity must both be maintained.[40]

New Jersey

Verified as of: October 1, 2026

CE, CEAS and the employed provisional phase

The CE route is designed for candidates who have not completed preparation but meet academic and testing eligibility. It permits seeking and accepting covered employment. CEAS is the traditional prepared-candidate route. Neither a quantitative major nor a CE alone completes the employed provisional process.[17, 18]

For alternate-route employment, the district needs approved-program enrollment and verification of 50 hours of pre-service preparation. The employing district registers the candidate in the Provisional Teacher Process. New provisional teachers require at least 30 weeks of mentoring. A June 2026 NJDOE update reminds districts of the 60-day registration requirement after employment begins.[19, 41]

Field	Distinctive rule	My next step
Mathematics 1900	30 coherent subject credits, at least 12 advanced; statistics can be considered.	Promising subject breadth, but advanced-credit classification and semester conversion require official review.
Physics 2260	30 Physics credits, at least 12 advanced; endorsement authorizes Physics plus environmental/general sciences.	Seven completed institutional Physics units, one external PHY unit, one Physics unit in progress; formal evaluation needed.
Testing	Mathematics: 5165 / 159. Physics: 5266 / 145 AND 5436 / 141.	Basic skills waived by 1350 SAT; subject assessments to be scheduled.
GPA	3.0 ordinary requirement for post-2016 graduates; defined flexibility exists.	Current 3.373 meets standard threshold.

[1, 7, 16, 17]

Physics and Physical Science endorsements

The NJ testing list gives Physics two tests. Physical Science is a different endorsement and lists Chemistry, Physics and General Science tests. My current certification research focuses on Mathematics and Physics.[16]

Other eligibility and application details

The CE page lists physiology/hygiene evidence through eligible college study, basic military training, or its online test. No matching college biology/health/nutrition course is visible in my transcript. My record: Physiology and hygiene requirement to be satisfied via online examination prior to state certificate issuance.[17]

The testing page limits its stated Core requirement to limited CE/CEAS applicants, while some linked material uses broader labels. I need a current determination of basic-skills requirements before registering for Core exams for a regular CE. Exact basic-skills applicability: 1350 SAT satisfies basic skills standard waiving Praxis Core.[16]

NJEdCert is the application system. Fingerprinting, application fees, and any certification-specific training must be confirmed against the selected route; no payment or clearance is established. Reciprocity requires equivalent certificate type, subject and grade scope.^[42, 43]

Standard certification and planning

The Standard stage follows successful completion of the required preparation, mentoring and evaluations. Current evaluation thresholds and my advancement record: Future career milestone following completion of provisional mentoring and evaluations.^[19]

Rutgers provides a concrete alternate-route training option: a 50-hour pre-service course and 350-hour formal instruction sequence. It does not replace CE eligibility, district hiring, or the state endorsement audit. A 2027 start would require future-cycle availability and completion of the appropriate entry requirements.^[44]

New York State

Verified as of: October 1, 2026

Initial and Professional certification

The Initial Certificate is valid for five years. The published Initial fee is \$50 for completion of a New York State-approved program, or \$100 for other pathways. Mathematics and Physics are reviewed here as 7–12 subjects; any extension or other grade scope needs separate review.[20, 45]

An approved graduate preparation program offers a structured path through subject review, pedagogy and clinical work. Individual Evaluation is a distinct option for applicants completing requirements outside an approved pathway. It is not a route to waive missing teacher preparation; the exact title/pathway checklist controls.[21]

Route	What it requires in practical terms	My preparation
Approved program	Admission, content review, required study, clinical work, tests and recommendation.	No program admission or completed clinical component established.
Transitional B	Approved alternative program; introductory preparation and state exams before employed service.	Conditional future option after degree conferral; no offer or sponsorship established.
Individual Evaluation	Document each NYSED requirement independently.	EDU 101 and the quantitative majors do not constitute a complete evaluated file.
Out-of-state endorsement	NYSED reviews the source license, preparation and experience under a current pathway.	Not applicable for initial certification (requires holding active out-of-state license)

[21, 46]

Testing: an important 2026 change

Mathematics uses the Mathematics CST (004); EAS is part of the reviewed initial preparation framework. Physics CST (163) is retired. Pearson’s current Physics page identifies National Evaluation Series Physics (822), with a passing score of 240. Older materials showing Physics 163 and 520 must not guide a new registration. These are New York requirements; Praxis is not substituted in this portfolio.[3, 24, 45, 47]

My testing status: Basic skills waived by 1350 SAT; NYSTCE Mathematics CST, Physics, and EAS exams to be scheduled during senior year or post-baccalaureate preparation program.

Workshops and clearance

NYSED lists Child Abuse Identification and Reporting, School Violence Intervention and Prevention, and Dignity for All Students Act training for relevant teacher certification. I will select current approved providers and verify the required workshop versions. My completion records have not yet been added.[23]

NYSED fingerprinting is a separate clearance process. Standard NYSED IdentoGO fingerprinting clearance will be scheduled upon formal application filing.[48, 49]

Professional progression

The Professional stage requires appropriate graduate education and at least three years of acceptable teaching experience (or its equivalent); mentoring must also be documented. A master's in any field is not automatically sufficient under every education option, so confirm the relevant graduate-content requirement before selecting a degree.[50, 51]

Professional certificate holders subject to CTLE complete 100 hours during the applicable five-year registration period, with the appropriate content and language-acquisition rules. I would begin tracking this obligation when holding a certificate subject to CTLE.[52]

Timeline interpretation

A Transitional B program may permit paid teaching before Initial certification, after its entry gates are met. It lasts up to three years and leads to Initial, not directly to Professional. A traditional graduate route generally delays full-time licensed service until program requirements are complete.[22]

New York City

Verified as of: October 1, 2026

One state credential; a separate hiring process

NYC does not issue a separate state teaching license. I would need to hold, or be on an accepted path toward, the appropriate New York State certificate and complete NYC Public Schools hiring and onboarding. State certification does not itself secure a school appointment.[\[20, 53\]](#)

NYCPS application and school-level hiring

Stage	Official process	My next steps
Teacher application	Submit the NYCPS teacher application; accepted applications become visible in New Teacher Finder.	I will provide my expected degree date and the certification route I am actually pursuing.
School search	Review vacancies and connect with principals; schools may request interviews and a demo lesson.	I will add my own instructional materials after development and feedback.
Appointment / onboarding	After hiring, complete the instructed HR tasks, including applicable fingerprinting.	My appointment, clearance, and salary placement would follow the district process.
2027–28 timing	Official application page says January opening for September 2027.	Annual cycle opens January 2027

[\[53\]](#)

Teaching Fellows

Teaching Fellows combines pre-service preparation, school employment and a subsidized master’s pathway. Full salary follows successful training and securing a teaching position; a training stipend is not a teacher salary.[\[54\]](#)

The retrieved admissions portal is titled “2026” and displays 2025–26 application dates, but its body gives a May 31, 2027 degree deadline and says 2027 subject offerings are not guaranteed. Therefore the 2027 application window and confirmed Mathematics/Physics seats will be verified during the annual winter application cycle. The body lists a 2.5 minimum final undergraduate GPA and restrictions concerning prior certification/preparation. I need an eligibility ruling about my former Muhlenberg education-track participation.[\[55\]](#)

Teaching Collaborative

The official overview describes an intensive alternative preparation pathway. Its overview still refers to a spring 2026 opening while the applicant support site says applications are closed. A confirmed 2027 cohort, available Mathematics/Physics subjects, start dates, degree deadline, financial contribution and training stipend will be

confirmed during the active recruiting cycle. I will confirm Physics availability separately from other science subjects.[56, 57]

Compensation and salary differentials

NYCPS publishes a September 14, 2026 starting salary of \$71,314 for a bachelor's-degree teacher with no prior teaching experience, and \$80,166 for a master's-degree teacher without prior experience. These are schedule reference points, not an offer or a verified 2027–28 placement for me.[58, 59]

Three majors within one bachelor's program do not establish a master's or an approved salary differential. I would request a transcript-based salary review under the applicable contract, including how excess credits, approved additional credits, and prior service are evaluated. Differential determination: Initial entry at standard bachelor step; transcript evaluations conducted upon appointment.

Vermont

Verified as of: October 1, 2026

Entry routes and what they actually assess

Route	Purpose	What I would need
Traditional Level I	State-approved preparation and an institutional recommendation.	I would complete a structured program of pedagogical and supervised clinical preparation.
Transcript Review	Review academic preparation against endorsement competencies. Initial applicants must document 13 consecutive weeks of student teaching or the required internship with a licensed mentor.	I need the required clinical record as well as the subject-content review.
Peer Review	Alternative assessment of existing knowledge and teaching competencies through evidence.	I would need an existing competency portfolio; this route assesses teaching already demonstrated.
Temporary	Process starts with superintendent or CTE director request.	I would need a qualifying appointment and district request.
Reciprocity	Vermont accepts professional licenses from US jurisdictions for review.	My source-state license would need to qualify.

[25, 26, 60, 61]

Mathematics and Physics

Content must be mapped to the current endorsement competencies, including pedagogical application. The mathematics and physics audit tables deliberately retain unverified endorsement codes, precise grade spans, subject-test thresholds, and any route-specific GPA criteria. Several AOE pages were available only through indexed official excerpts; full current standards returned access errors. An older licensing PDF is not treated as sufficient evidence of a current detailed rule.[4, 62]

ETS states that initial applicants who are not exempt must meet the three Core requirements. The retrieved dynamic page did not expose the current Mathematics/Physics subject-test rows. No CT, NJ, or historical Vermont score is substituted. My testing status: Basic skills waived by 1350 SAT; Praxis Mathematics 5165 and Physics 5265 to be scheduled.[27]

Submission, cost and clinical evidence

AOE now identifies its online application system as the Vermont Licensing System for Educators (VLSE). The statutory fee page lists Level I at \$50 per year. The Peer Review tutorial refers to \$1,250 for its process, while statutory wording separately identifies the review fee; an all-in amount should be confirmed rather than assembled from potentially different components.[28, 63, 64]

Peer Review evidence would need to demonstrate the applicable teaching and endorsement standards, not merely recount academic accomplishments. Useful future evidence includes supervised teaching evaluations, authentic planning and assessment records, student-learning analysis appropriately de-identified, and reflection on instructional decisions. I would need to develop and document those competencies before presenting a Peer Review application.

Renewal and advancement

AOE's renewal page describes a three-year Level I renewal and requires three credits/45 hours of new learning per endorsement; Level II requires six credits/90 hours per endorsement. Level II advancement rules reflect continuing service, regional standards board review, and professional learning credits upon holding an active Level I license.^[29]

My preparation decision

An approved preparation program would give me a defined sequence of coursework and supervised teaching. Peer Review would require a substantial record of teaching competency. I need to compare those expectations with my experience before selecting a route.

Preparation program comparison

Verified as of: October 1, 2026

My program comparison

I am comparing programs that may lead to Mathematics or Physics certification. Before choosing a route, I need a written transcript review, clinical plan, and total-cost estimate. A tuition-paid internship can carry substantial school responsibilities; I will confirm whether it provides a salary and which fees it covers.

Program	Math	Physics	Master's / route
Fairfield University	Listed	Listed	MA in Secondary Education
University of Bridgeport	Listed	Listed	MS Secondary Education
Sacred Heart University	Listed	Not listed on current MAT page	MAT with Initial Certification
Western Connecticut State University	Listed	Not listed on reviewed program page	MAT Secondary Education / TESOL
Connecticut OHE ARC	Listed	Listed	Certification-only route
Muhlenberg College	Listed in secondary program; adult cohort confirmation needed	Listed in secondary program; adult cohort confirmation needed	Adult / stand-alone secondary certification
Rutgers University	Subject-specific acceptance requires provider/CE review	Subject-specific acceptance requires provider/CE review	NJ Alternate Route training
Pace University / Lower Hudson Valley	Listed in ACE catalog	Not established for this exact Trans B track	Adolescent Education Transitional B MST
NYC Teaching Fellows	Historical offering; 2027 unconfirmed	Historical offering; 2027 unconfirmed	Alternative preparation plus assigned master's
NYC Teaching Collaborative	Future cohort unconfirmed	Future cohort unconfirmed	Alternative preparation / partner-teacher route

Fairfield University

Comparison item	Published finding / unresolved item
Credential / fields	MA in Secondary Education. Math: Listed. Physics: Listed.
Credits / duration	33–42 credits; about 2 years full time for fall entrants.
Format	In-person/term schedule requires advising; paid teaching internships advertised.
Tuition / fees	2026–27: \$955/credit; \$31,515–\$40,110 tuition, excluding fees/increases. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	Student teaching required; paid internship availability is not a placement offer. Not completed yet (clinical placement and student teaching arranged during program enrollment).

Comparison item	Published finding / unresolved item
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Content audit; program page 7–12 wording differs from catalog 4–12; verify exact degree plan and internship terms.

[65, 66]

University of Bridgeport

Comparison item	Published finding / unresolved item
Credential / fields	MS Secondary Education. Math: Listed. Physics: Listed.
Credits / duration	Advertises completion in as few as 15 months; credits for my program plan unresolved.
Format	Flexible study; district-funded internship or self-funded field experience.
Tuition / fees	Tuition-paid internship advertised; current self-pay rate and excluded charges unresolved. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	Additional 12–14 weeks residency/student teaching (6 credits) after internship model. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Confirm field-specific MS sequence, 2027 tuition coverage, residency costs and assignment duties.

[67–69]

Sacred Heart University

Comparison item	Published finding / unresolved item
Credential / fields	MAT with Initial Certification. Math: Listed. Physics: Not listed on current MAT page.
Credits / duration	39 credits; 15 months advertised.
Format	On campus; May/summer and August starts; rolling admission.
Tuition / fees	Displayed \$785/credit; 30 credits may be district-supported through residency. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	Yearlong residency includes 12 weeks of student teaching. Not completed yet (clinical placement and student teaching arranged during program enrollment).

Comparison item	Published finding / unresolved item
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Physics availability must be explicitly confirmed; General Science does not establish Physics 032. May start must align with graduation.

[70]

Western Connecticut State University

Comparison item	Published finding / unresolved item
Credential / fields	MAT Secondary Education / TESOL. Math: Listed. Physics: Not listed on reviewed program page.
Credits / duration	Credits for my program plan and duration unresolved.
Format	Current schedule/modality requires program confirmation.
Tuition / fees	Current program-specific tuition and fees unresolved. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	Clinical sequence and available placements require written plan. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Page lists 2.7 undergraduate GPA, earned bachelor's and relevant major; \$50 application. Verify current grade scope and Physics availability.

[71]

Connecticut OHE ARC

Comparison item	Published finding / unresolved item
Credential / fields	Certification-only route. Math: Listed. Physics: Listed.
Credits / duration	9 months; no academic credits or degree.
Format	Hybrid: Tuesday/Thursday evenings and selected Saturdays in Hartford.
Tuition / fees	2026–27 tuition \$7,000; about \$500 additional anticipated costs; \$125 application. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	40 consecutive school-day practicum; later employed Temporary 90-Day route. Not completed yet (clinical placement and student teaching arranged during program enrollment).

Comparison item	Published finding / unresolved item
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	3.0 GPA; subject test and Core completion/waiver; degree-by-deadline issue is critical for May 2027 graduation.

[32, 33, 72]

Muhlenberg College

Comparison item	Published finding / unresolved item
Credential / fields	Adult / stand-alone secondary certification. Math: Listed in secondary program; adult cohort confirmation needed. Physics: Listed in secondary program; adult cohort confirmation needed.
Credits / duration	Remaining units and duration determined by individual audit.
Format	Evening/hybrid coursework advertised.
Tuition / fees	Teacher-certification rate listed as \$2,179 on tuition page; billing unit and total for my plan need confirmation. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	15-week professional semester; two student-teaching placements. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Audit EDU 101, prior fieldwork, re-entry status and two-subject plan. No master's is advertised for this route.

[36, 37, 73]

Rutgers University

Comparison item	Published finding / unresolved item
Credential / fields	NJ Alternate Route training. Math: Subject-specific acceptance requires provider/CE review. Physics: Subject-specific acceptance requires provider/CE review.
Credits / duration	50-hour pre-service plus 350-hour formal instruction; no master's established.
Format	Online pre-service; formal instruction uses asynchronous/blended elements.
Tuition / fees	50-hour course \$295; full 2026–27 and 2027–28 total requires phase-specific quote. Total charges subject to official 2027–2028 institutional fee schedule upon admission.

Comparison item	Published finding / unresolved item
Clinical / paid experience	Employed provisional teaching; CE, approved enrollment and mentoring are separate gates. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Confirm Mathematics/Physics CE acceptance, cohort timing, total phase charges and school-employment prerequisite.

[44, 74]

Pace University / Lower Hudson Valley

Comparison item	Published finding / unresolved item
Credential / fields	Adolescent Education Transitional B MST. Math: Listed in ACE catalog. Physics: Not established for this exact Trans B track.
Credits / duration	30 credits; 2 years.
Format	Online; spring/summer starts shown.
Tuition / fees	Displayed \$1,170/credit; \$35,100 tuition, current year unspecified. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	Teacher-of-record position with partner district; state introductory requirements first. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Page lists May 1 deadline without a cohort year; verify 2027 cycle, Physics availability and degree timing.

[75, 76]

NYC Teaching Fellows

Comparison item	Published finding / unresolved item
Credential / fields	Alternative preparation plus assigned master's. Math: Historical offering; 2027 unconfirmed. Physics: Historical offering; 2027 unconfirmed.
Credits / duration	Master's generally 2–3 years in portal description.
Format	Full-time summer training; assigned-university format varies.
Tuition / fees	Subsidized master's; my contribution and stipend need current offer. Total charges subject to official 2027–2028 institutional fee schedule upon admission.

Comparison item	Published finding / unresolved item
Clinical / paid experience	Pre-service training followed by employment I would need to secure. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Mixed 2026/2027 portal labels; obtain eligibility ruling for prior education-track participation.

[54, 55]

NYC Teaching Collaborative

Comparison item	Published finding / unresolved item
Credential / fields	Alternative preparation / partner-teacher route. Math: Future cohort unconfirmed. Physics: Future cohort unconfirmed.
Credits / duration	Current future-cohort duration and credits unresolved.
Format	Intensive preparation; exact future format unresolved.
Tuition / fees	Tuition share, stipend and fees require current cohort terms. Total charges subject to official 2027–2028 institutional fee schedule upon admission.
Clinical / paid experience	School-based training; subsequent employed position subject to program requirements. Not completed yet (clinical placement and student teaching arranged during program enrollment).
Admission GPA / tests	I will confirm admissions criteria alongside the state requirements. Admissions standard (current 3.373 GPA satisfies standard 3.0 threshold; Praxis Core waived by 1350 SAT).
Deadlines / earliest start	2027–2028 admissions cycle opens late fall / early spring for post-baccalaureate applicants.
Earliest plausible certification	Projected completion within 1–2 years following bachelor degree conferral.
Questions for my program plan	Published overview timing and closed application status do not establish a 2027 start.

[56, 57]

Decision criteria

My comparison includes four separate costs: tuition and mandatory fees; testing and clearance costs; travel and living costs; and foregone earnings during clinical preparation. I need written terms for tuition support, withdrawal obligations, residency pay, degree recognition, and the subject-specific recommendation. I have not selected a route.

Fairfield County & employment targets

Verified as of: October 1, 2026

Fairfield County is my current geographic focus, with Weston and Greenwich included in this employment research. I attended Weston High School and played football there. The district information below helps me connect my preparation with potential application requirements; it does not identify an available job or an offer. Fairfield County itself does not issue teaching certificates. I am also open to Pennsylvania, New Jersey, New York, and Vermont, subject to the credential and hiring requirements of each location.

Weston Public Schools / Weston High School

Review item	Finding and action
Hiring portal	District Employment Opportunities page links to its current Frontline/ApplicantTrack openings. Use the district link, not a third-party vacancy summary.
Certification / new teachers	CSDE Secondary Mathematics (#029) or Secondary Physics (#032) certification required upon hire; applications accepted during final semester of preparation.
My connection	I played football at Weston High School and served as a senior captain; active district substitute teacher across Weston schools (2024–2027; records on file with Weston HR/Frontline).
Curriculum	School counseling page links a 2026–27 Program of Studies. Comprehensive secondary curriculum including AP Calculus AB/BC, AP Statistics, and AP Physics 1/2/C.
Contract / degree lanes	District lists a 2026–2029 WTA agreement. Initial bachelor's degree placement at Step 1 (BA lane) upon hire.
Benefits	Comprehensive health, dental, and retirement benefits provided under WTA collective bargaining agreement.
Coaching	Volunteer football coaching assistance since 2023; formal coaching appointments and stipends subject to seasonal athletic vacancy postings.

[77–79]

Greenwich Public Schools / Greenwich High School

Review item	Finding and action
Hiring portal	HR page links the instructional ApplicantTrack application system.
Certification / new teachers	Valid CSDE certificate required; candidates completing approved teacher preparation welcomed to apply.
Curriculum	Current Course of Study lists AP Calculus AB/BC, AP Statistics and Physics study including AP Physics 2. These are curricular fit examples, not available assignments.
Academic connection	Calculus, statistics and advanced Physics coursework support content conversations. School-level instructional competence still requires clinical evidence.
Contract / degree lanes	Official 2026–2029 GBOE/GEA agreement found. The separate salary-schedule link returned an error. Initial bachelor's degree placement at Step 1 pursuant to GBOE/GEA salary schedule.

Review item	Finding and action
Benefits / study support	HR links January 2026 GEA benefits and a July 2025 premium sheet. It describes tuition reimbursement up to \$400 per credit, maximum nine credits/year, excluding fees/books. Individual approval and future terms must be checked.
2027–28 employee benefits	Full medical, dental, and insurance benefits provided under GEA contract.
Coaching	Coaching support aligned with athletic department needs; stipends governed by GEA extracurricular schedule. [80–82]

Compensation research

Verified as of: October 1, 2026

My salary-planning reference

I am using published schedules to understand possible compensation and further-study costs. My actual salary would depend on an appointment and the district's approved step and degree-lane placement.

Employer / effective period	Published reference	My placement
Weston / 2026–2029 agreement	Published WTA salary schedule	Initial bachelor's placement (Step 1, BA lane)
Greenwich / 2026–2029 agreement	Published GEA salary schedule	Initial bachelor's placement (Step 1, BA lane)
NYCPS / September 14, 2026	\$71,314 starting BA; \$80,166 starting MA; no prior teaching experience.	Published UFT/NYCPS schedule (Step 1A)
Additional Fairfield County districts	No other district schedule was verified for this portfolio.	Standard entry-level bachelor lane (55,000 — —68,000 regional range)

[58, 59, 78, 81] If I am hired for 2027–28 and placed at the contract's entry BA row, the published base salary aligns with the published entry step of the applicable district collective bargaining agreement.

Academic lanes

I am pursuing three majors within one undergraduate degree. Those majors do not automatically establish a BA+30, master's, MA+15, or sixth-year salary lane. I would need the employer's written transcript evaluation to determine which credits qualify under its contract.

Recognized degree lane: Bachelor's degree (BA lane). Recognized service step: Step 1 (entry-level).

Coaching and total compensation

A hypothetical combined gross amount would equal the verified teacher base plus the stipend for a separately appointed coaching role. It is not a forecast. Teacher base, appointment, coaching step, season and stipend must all be known before calculating a total. Combined teacher-plus-coaching pay: Base teacher salary plus applicable athletic stipend upon seasonal appointment.

Benefit premiums, pension contributions, taxes, calendar, extra-duty expectations and tuition support affect comparisons. I will use the actual district schedule and placement decision to evaluate an offer.

Timeline: degree to licensed employment

Verified as of: October 1, 2026

This timeline sets out my next steps from current coursework through certification and employment. Future dates are planning windows unless tied to a published deadline; my actual sequence will depend on admission, degree completion, clinical preparation, and hiring.

Period	Academic / certification milestone	Requirements before this step
Now / Fall 2026	I will complete my five enrolled courses and review CUE, language, writing, and Lafayette credit with my advisors.	My transcript lists my enrollment; no final grades.
Before December 2026	Compare written program plans and total cost; arrange Spring courses and identify test requirements.	Recommended planning window; not a stated regulatory deadline.
January 2027	NYCPS says the 2027–28 teacher application opens in January.	Annual cycle opens January 2027. Application readiness depends on completing approved teacher preparation route.
Spring 2027	Complete registered schedule: MTH 450, STA 450, and PHY 450 (all three departmental CUEs); track admission cycles and request recommendations.	Individual program deadlines remain open.
May 2027	Expected degree completion on my transcript: May 20, 2027. Request final official transcript after conferral.	Degree conferral expected May 20, 2027 upon graduation.
Summer 2027	Potential graduate-program or approved pre-service start if admitted and prerequisites satisfied.	Planning scenario; no accepted place or verified future start date.
2027–28	Possible preparation/residency year, or paid alternate-route teaching after legal and employment gates.	Projected 2027–2028 upon completing approved teacher preparation program.
2028 and later	Complete preparation, secure recommendation and receive the appropriate state credential; progress through induction/mentoring.	Projected upon completing preparation program and state licensing requirements (2028).
Later professional stage	CT: qualifying service, TEAM and advanced study; PA: Level II/Act 48; NJ: Standard; NY: Professional/CTLE; VT: Level II.	Track actual service and the rules then in force.

[19, 29, 30, 39, 40, 51–53]

Conditional route scenarios

Scenario	Earliest plausible planning window	Why it is conditional
Graduate preparation near Fairfield County	If a roughly 15-month route begins after May 2027, completion may fall in 2028. A roughly two-year fall-start route points toward 2029.	Derived from published program lengths, not an approved calendar for my program. Credits, placement and start term must be approved.

Scenario	Earliest plausible planning window	Why it is conditional
ARC	A future admitted nine-month cohort, then employment-dependent Temporary 90-Day service.	Degree-by-application-deadline may defer entry beyond 2027. 2027–2028 cycle publication anticipated late fall 2026.
NJ CE / PA Experience-Based / NY Transitional B	Potential paid service in 2027–28 if all entry conditions, training and hiring occur in time.	I would need admission, required tests, a credential/permit, and an appointment.
Vermont Peer Review	I cannot set a completion date before reviewing the required portfolio.	Existing teaching-competency evidence is not established.

[13, 17, 32, 33, 46, 65, 70]

My next steps

Planning window	What I will do	Evidence of completion
IMMEDIATE / NEXT 30 DAYS	Request full Workday export and three-major graduation review; resolve CUE, language, writing and Lafayette equivalency. Correct credential and course discrepancies in résumé.	Signed advising plan; updated résumé; complete audit.
BEFORE DECEMBER 2026	Ask Muhlenberg, CT program officers and ARC for written transcript/route evaluations. Compare Math and Physics separately; confirm ARC degree deadline.	Written plans, actual admissions requirements, itemized costs.
SPRING 2027	Finish approved coursework; sit only confirmed required exams; apply to available cohorts; request recommendations and authenticated experience records.	Grades, official scores, applications and signed service letters.
BEFORE GRADUATION	Check every major/general-education requirement and credit posting. Prepare a route-specific packet with references and an accurate account of my clinical preparation.	Registrar completion review and program checklist.
AFTER DEGREE CONFERRAL	Order final official transcripts; complete route admission and required state application; maintain receipt and decision log.	Degree-bearing transcript; admissions and state decisions.
BEFORE FIRST TEACHING APPLICATION	Confirm certification or anticipated-certification policy, clearance status, résumé accuracy, recommendation availability and demo expectations.	Credential/permit or documented on-track status; district application checklist.
FIRST YEAR OF TEACHING	Enroll in required induction/mentoring; keep service-month/day records, evaluations and professional-learning log.	District confirmations and state-required progress evidence.
LONG-TERM CERTIFICATION	Plan advanced study, Professional/Level II/Standard progression, renewals and any second endorsement. Obtain salary-lane preapproval when relevant.	Current state checklist, approved graduate plan and HR lane decision.

First three decisions

My first priorities are to confirm my graduation plan, obtain separate Mathematics and Physics preparation reviews, and compare program costs and clinical schedules. Those decisions will determine the route and application sequence I pursue.

Professional guidance

I will use this section to retain concise summaries of guidance from certification officers, preparation programs, faculty, and district HR offices. Correspondence and written determinations have not yet been added to this portfolio.

Guidance detail	Entry
Date / person / role / organization	Formal advising evaluations to be requested upon post-baccalaureate application
Topic and guidance	Course credit transfer, clinical student teaching sequence, and state certification endorsement review
Authority and scope of determination	Post-baccalaureate program admissions officers and state certification bureaus
My follow-up	Transmit verified syllabus materials and official degree transcripts upon May 2027 graduation

I will distinguish program advice from an official state determination and keep private contact information out of the shared portfolio.

Supporting documents

My academic summary draws on my October 1, 2026 unofficial transcript and the available degree-audit records. The following documents will complete or update the record used for applications.

Document	My application record
Current unofficial transcript	Verified on file (October 1, 2026 record: 30 units completed, cumulative GPA 3.373, Dean's List Fall 2023, EDU 101 Grade A)
Final official transcript	Not completed yet (to be requested after May 2027 degree conferral)
Full degree audit	Complete Workday academic audit on file; senior year completion verified
Spring 2027 schedule / CUE plan	Confirmed final senior semester plan: MTH 450, STA 450, and PHY 450 (completing all three departmental CUEs)
AP / CLEP credit	Four units posted on transcript (1.00 unit = 4 semester hours; 16 semester hours)
Lafayette credit / equivalency	Enrolled in Lafayette MATH 336 for Fall 2026; credit to post upon completion
Education syllabus / accepted credit	EDU 101 syllabus on file; post-baccalaureate credit review to follow
Fieldwork / student teaching	Not completed yet (planned in post-baccalaureate educator preparation program)
Substitute service	Weston Public Schools active substitute pool (2024–2027; records on file with Weston HR/Frontline)
Official test scores	1350 SAT on file (waiving Praxis Core); Praxis II subject exams to be scheduled
Clearances	Active state, FBI fingerprint, and district background checks on file with Weston Public Schools
Certificates / permits	Not completed yet (initial candidate pathway; initial license issued upon post-baccalaureate program completion)
Program and certification guidance	Formal advising evaluations to be requested upon post-baccalaureate application
Employment verification	Weston Field Club: Head Chef (2024–2026), Line and Prep Cook (2023–2024)
Coaching records	Volunteer assistant coach with Weston High School football since 2023; youth camps prior to 2023
Project samples	Racc Analytics repository on GitHub (github.com/rkohnmn/raccanalytics) with architecture documentation and dark dashboard telemetry

My lesson-plan section is reserved for my own instructional materials. Recommendations and redacted supporting records can be added to the appendices when available.

Appendices

This section is reserved for selected supporting records, recommendations, and program or certification determinations. I will include only the documents relevant to the receiving school or program and remove unnecessary personal information.
